

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Compliments of
J. WILLARD MORGAN,
COMPTROLLER,
STATE OF NEW JERSEY.

The first part of the paper discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the success of any business or organization. The author provides several examples of how poor record-keeping can lead to financial loss and legal complications.

In the second part, the author explores the various methods used to collect and analyze data. This section includes a detailed discussion of statistical techniques and their application in different fields. The author also mentions the importance of using reliable sources of information and the need for critical thinking when interpreting data.

The third part of the paper focuses on the role of technology in modern business operations. It highlights how advancements in computer science and communication technology have transformed the way businesses operate. The author discusses the benefits of automation and the challenges associated with integrating new technologies into existing systems.

Finally, the author concludes by emphasizing the importance of continuous learning and adaptation in a rapidly changing world. The author encourages readers to stay informed about the latest trends and developments in their respective fields and to be open to new ideas and approaches.

December 1st.—Mrs. Harvey DeBaun, passenger, at Weehawken, train No. 61; conductor, G. E. Wilson. Screw which held seat back projected, and as she went to sit down, it caught her dress, tearing a large rent in it.

December 9th.—William Springmyer, fireman, at Weehawken, engine No. 1049; A L. Milliken, engineer. Was raising iron tank box to put block under it, and it slipped from his grasp, falling on his right foot, badly cutting it.

December 12th.—Eugene Mehr, engineer, at Weehawken yard, No. 255; conductor, F. Smith. Mehr's engine and engine No. 131 came together, and he was thrown against back of cab, badly cutting his upper lip.

December 23d.—Paul H. Sommer, fireman, at Weehawken yard, No. 370; conductor, W. Downey; engineer, Furlong. While walking down between tracks No. 13 and No. 14, he was struck by stirrup of one of the cars in train which was being pulled up track No. 14, and his nose and lips were badly cut.

December 24th.—John Bedell, fireman, at Weehawken, engine No. 171; engineer, Peter Fox. While taking water at water column, water spout fell down, and he was thrown to the ground. Head, shoulders and hip bruised.

December 31st.—Nelson E. Baker, brakeman, at Weehawken yard, No. 312; conductor, C. Forms; engineer, Huber. While climbing up ladder of box car, he was struck by tunnel car which was on next track, and knocked to the ground, landing on rail on his back. Hurt inwardly. Back injured.

WEST SIDE CONNECTING RAILROAD COMPANY.

To the Comptroller of the State of New Jersey:

In obedience to the Laws of the State of New Jersey (G. S. of N. J., p. 2675), requiring annual reports to be made to the Legislature and transmitted to the Comptroller by the railroad companies of the State, the West Side Connecting Railroad Company presents the following report for the year ending December 31st, 1905:

Capital stock paid in, \$125,400 00

The road as constructed extends from Danforth avenue to a connection with the Newark and New York Railroad, all in the city of Jersey City, a total distance of eighty-nine one hundredths (.89) of a mile.

It is equipped and operated by the Central Railroad Company of New Jersey, and the further information required by law is furnished by that company.

State of New York, city and county of New York, ss.—Robert W. DeForest, being duly sworn, on his oath says that he is Vice-President of the West Side Connecting Railroad Company, and that the foregoing statement is true and correct to the best of his knowledge and belief.

ROBERT W. DE FOREST.
